

# Re:Sourcing UK

## ClarkeSon Recycling Ltd: *Natural Nutrient Recovery*

ClarkeSon Recycling is an established, family owned composting facility that specialises in the recycling of source segregated commercial, industrial and household biodegradable wastes.

The compost produced meets the stringent requirements of BSI PAS 100, meaning that it is regarded as being fully transformed from waste into a beneficial product.

As well as taking in green waste from municipal collections, ClarkeSon are able to shred and process wood waste and other appropriate materials with beneficial nutrient value.

Passionate about offering recycling services to solve local problems, ClarkeSon Recycling are developing a new organics centre of excellence, handling a broad range of food, drink and biomass materials. Once operational, they aim to process animal bedding, wood pellets and fuel briquettes.

“

We want to see local organic wastes recycled locally, keeping the resources and the value in the region. There is a lot of talk about a closed-loop economy - that is exactly what we seek to do at ClarkeSon Recycling.

”

*Steve Clarke, Managing Director, ClarkeSon Recycling*

*ClarkeSon Recycling subscribe to the Re:Sourcing UK monthly Resource Bulletin, which provides information on around 100 waste-related opportunities every month, from industrial waste streams seeking novel recovery approaches, live UK Tender listings or innovation offers from across Europe. This Bulletin allows companies to list their wastes anonymously, for review by specialist recyclers, innovators and academics.*

*If you wish to list waste streams in the Bulletin, or receive a copy of it every month, then please get in touch.*
