

Re:Sourcing UK

Harris Tobias: Thought for Food

Harris Tobias have been innovative recyclers of oils and fats since 1900, sourcing materials for use in the animal feed, oleochemical and energy markets. Such routes provide companies with an opportunity for Industrial Symbiosis, where another industry makes positive use of what is perceived to be waste.

In recent years, Harris Tobias have diversified into general food waste recycling, working with major blue chip food manufacturers in order to find non-landfill routes for food waste material that is produced. Such routes may include composting, anaerobic digestion, oil recovery or animal feed.

Harris Tobias have proven themselves to be enthusiastic recyclers offering a professional service to Re:Sourcing UK members.

“ Different organic wastes offer different recycling opportunities. Some can be used as animal feed, others are more suited to energy recovery through anaerobic digestion. Our role is to help deliver best-value to Re:Sourcing UK members by matching their food or oil byproducts to the appropriate market. ”

Jackie Stott, Director, Harris Tobias

Harris Tobias subscribe to the Re:Sourcing UK monthly Resource Bulletin, which provides information on around 100 waste-related opportunities every month, from industrial waste streams seeking novel recovery approaches, live UK Tender listings or innovation offers from across Europe. This Bulletin allows companies to list their wastes anonymously, for review by specialist recyclers, innovators and academics.

If you wish to list waste streams in the Bulletin, or receive a copy of it every month, then please get in touch.
