

## Recycle8: Seeking Bags Of Value

Recycle8 present an innovative offering, seeking packaging materials such as woven polypropylene builders bags for their recycling outlets. Such materials are often deemed 'general waste' and contaminated beyond recovery by being disposed of in the skip.

By advising that such materials be kept separate, Recycle8 are able to collect and recycle these bags, and have demonstrated strong take-up by customers.

Mild contamination is not a problem for Recycle8, although it is advisable that the bags be baled to maximise load efficiency.

Recycle8 have been able to offer their successful service to Re:Sourcing UK members from Derbyshire up to Scotland.

“ Builders’ Bags are common to many industrial sectors, and are frequently seen as difficult to dispose of due to contamination and bulky size. Our tailored service means that Re:Sourcing UK members can know that their bulk bags are being recycled rather than taking up room in the general waste.”

*Ian Spence, Managing Director, Recycle8*

*Recycle8 subscribe to the Re:Sourcing UK monthly Resource Bulletin, which provides information on around 100 waste-related opportunities every month, from industrial waste streams seeking novel recovery approaches, live UK Tender listings or innovation offers from across Europe. This Bulletin allows companies to list their wastes anonymously, for review by specialist recyclers, innovators and academics.*

***If you wish to list waste streams in the Bulletin, or receive a copy of it every month, then please get in touch.***
