

Re:Sourcing UK

Resons Solutions Ltd: *Sustainability Through Innovation*

Resons Solutions Ltd in London offers a range of services including aggregate processing and waste remediation.

Resons can not only help companies achieve target chemical & mechanical properties to make disposal easier, but with their innovative Waste to Product service, they can find profitable alternatives that will save money in comparison to landfill costs.

For example, they have developed a process to turn trommel fines with a loss on ignition of up to 50% into a construction product, ensuring that 100% of the 0-20mm fines in the process are all recycled and therefore diverted from landfill.

They also have a process to process gully arisings and road sweepings, turning them into a construction material in line with current WRAP quality protocols.

Forthcoming changes in taxation on fines from recycling facilities will mean that certain by-products will no longer qualify for the lower-rate tax. Resons Solutions can help companies separate and transform their waste into resources and avoid costly landfill tax increases.

Robert Evans, Managing Director, Resons Solutions Ltd

Resons Solutions Ltd subscribe to the Re:Sourcing UK monthly Resource Bulletin, which provides information on around 100 waste-related opportunities every month, from industrial waste streams seeking novel recovery approaches, live UK Tender listings or innovation offers from across Europe. This Bulletin allows companies to list their wastes anonymously, for review by specialist recyclers, innovators and academics.

If you wish to list waste streams in the Bulletin, or receive a copy of it every month, then please get in touch.
