

Re:Sourcing UK

UK Environmental: *Your Waste Is Their Resource*

UK Environmental is one of the North West's leading waste management and recycling companies. Providing cutting edge technologies, including Materials Recycling Facilities, drying outlets, Anaerobic Digestion and Waste to Energy, they collect, sort, treat and recycle a wide range of wastes and industrial by-products.

They have been highly proactive in identifying waste streams featured in the monthly Resource Bulletin which meet their process requirements; in particular, they have sourced a range of filtercakes, processing dusts, spoil heaps, sludges and other inert waste streams which can be utilised within their land engineering operations. In each case, the companies producing the wastes have been impressed with the professional service offered by UK Environmental as well as the cost savings achieved.

“ Through the innovative Re:Sourcing UK model, we have helped companies save money through the recovery of dusts, filtercakes and sludges. Their fresh approach ensures that waste streams are showcased as a resource, maximising the opportunities for waste producers. ”

Amar Seth, Managing Director, UK Environmental

UK Environmental subscribe to the Re:Sourcing UK monthly Resource Bulletin, which provides information on around 100 waste-related opportunities every month, from industrial waste streams seeking novel recovery approaches, live UK Tender listings or innovation offers from across Europe. This Bulletin allows companies to list their wastes anonymously, for review by specialist recyclers, innovators and academics.

If you wish to list waste streams in the Bulletin, or receive a copy of it every month, then please get in touch.
