Link2Energy Ltd (“L2E”) has been at the forefront of Industrial Symbiosis activity in the UK for over a decade, identifying and facilitating practical solutions for industries with problematic bulk waste streams and byproducts.

L2E provides a highly-effective market-engagement service, whereby potential partners are approached with samples of the material and client-agreed information, and the collected feedback and other research provided to the client in the form of a full report complete with contact details for interested outlets.
